YOUR SAFETY, OUR COMMITMENT.

MCB's | RCCB's | Isolators | DB's

Catalog 2025

PROTECTING YOUR POWER WITH SAFETY AND RELIABILITY.

World-Class Safety Standards

Tripper products adhere to globally recognized safety standards, including IEC, UL, and IS. They are certified with CE/UL markings and DEKRA certification, ensuring superior quality and reliability.

Redefining Safety

Finger-proof terminals eliminate the risk of accidental contact with live parts. Install, operate, and maintain Tripper products with complete confidence and peace of mind.

Energy Limiting Class 3

In the event of a fault, the rapid arc-quenching mechanism activates, swiftly extinguishing the arc. This limits energy flow through the circuit, reducing fire risks and extending the lifespan of your equipment.

Safety with Superior Aesthetics

Ergonomically designed with a focus on superior cooling and built using fire-retardant materials, Tripper products combine enhanced safety with elegant aesthetics.

True Contact Indication

The Tripper range ensures safety with clear, true contact indication. The red and green flags provide positive electrical ON/OFF status visibility, even from a distance, regardless of knob position.

Innovative Breathing Channels

When multiple poles are placed side by side, the innovatively profiled breathing channels facilitate efficient air circulation around each pole. This design ensures cooler operation and prolonged performance year after year.

Large Terminal Size with Biconnect

Tripper products can easily accommodate cables up to 35 sq mm. The biconnect terminals offer the flexibility of connecting both cables and bus bars, ensuring convenience and efficiency.

Two-Position DIN Rail Clip

Mounting on DIN rails is simplified with the standard two-position DIN rail clip, making installation quick, secure, and more convenient.

Non-Welding Contacts

Silver-graphite contact tips provide exceptional durability and superior resistance to welding, ensuring longer life and enhanced safety for your system.

Combihead Screw

Tripper products feature combihead screws that accommodate both standard and Phillips screwdrivers, offering unmatched flexibility and ease during installation or maintenance.

Our MCB's, RCCB's, Isolators, and DB Box offer reliable electrical protection, ensuring safety by preventing overloads, earth faults, isolating circuits, and organizing power distribution in residential and commercial setups.

- Miniature Circuit Breakers (MCBs) are essential in your home for protecting electrical appliances from voltage overloads and short circuits, ensuring safety and preventing fire hazards.
- Isolators are crucial in your home for safely disconnecting electrical circuits during maintenance or emergencies, preventing accidents and ensuring protection.
- Residual Current Circuit Breakers (RCCBs) are vital in your home for detecting and preventing earth leakage currents, safeguarding against electric shocks and ensuring electrical safety.
- A DB (Distribution Box) is essential in your home for organizing and controlling electrical circuits, ensuring safe power distribution and protection from overloads.

**SAFETY YOU CAN TRUST,
VALUE YOU DESERVE.**
